Paracelsus Biological Medicine Seminar Series  
November 2006 to September 2008

Seminar and Workshop Curriculum Schedule  
[www.pbm.org](http://www.pbm.org) | 508.748.0816

## The Paracelsus Biological Medicine Network is pleased to present...

the start of a two-year curriculum of Paracelsus Biological Medicine consisting of four weekend seminars [in the Marion, Massachusetts area] and four workshops [at the Whole Life Clinic, Santa Fe, New Mexico]. The combined eight weekends are designed as a comprehensive study of the principles and practices of Paracelsus Biological Medicine as taught by Dr. Thomas Rau, Medical Director of the Paracelsus Klinik in Switzerland.

Please see the following pages regarding details for the entire two-year PBMN seminar series.

This intensive PBMN seminar series is designed for MDs, NDs, RNs, DDSs, DCs and DOs; allied health care practitioners; and those attending school in the holistic medical field. Certificates will be awarded after each seminar and workshop. Receipt of the PBMN diploma entitles the practitioner to a one-week internship at the Paracelsus Klinik in Switzerland.

Participants who complete the entire two-year certification process will be invited to a one-week, complimentary internship at the Paracelsus Klinik.

The full registration fee for each seminar and each workshop is \$800. The early registration fee is \$725 and early registration dates will be announced. A student discount of \$100 is available.

**To be become certified, candidates must be allied health care practitioners [MD, ND, RN, DO, DC, DDS] or attending school in the health care field.**

\*This brochure was printed on 100% post-consumer recycled paper with soy inks.

## Seminar 1

November 10-12, 2006

Rachel's Lakeside,  
Dartmouth, Massachusetts

Presenters: Thomas Rau, MD;  
James Odell, OMD, L.Ac;  
Hennie Fitzpatrick, MD;  
Frank Pleus, MD, DDS

This foundational seminar introduces the essential concepts of Biological Medicine, illuminating biological regulation, the polymorphistic model, and homotoxicology. The role of Biological Dentistry, homeopathy and isopathy will be examined. Through an exploration of the mind/body paradigm, the psychoemotional themes of illness, and clinical approaches to the patient, seminar participants will draw toward the heart of Biological Medicine. Additional Mini Workshops in Darkfield Microscopy, Remedies, Energetic Anatomy and Physiology, and Intake and Assessment Skills will be offered.

## Workshop 1

February 9-11, 2007

Whole Life Clinic,  
Santa Fe, New Mexico

Presenters: Byron Braid, MD;  
James Odell, OMD, L.Ac;  
Hennie Fitzpatrick, MD;  
Bill Wolfe, DDS

Workshops teach specific diagnostic and therapeutic techniques of the Biological Medicine model. The primary focus of Workshop 1 is diagnosis, with presentations on physical examination techniques including Traditional Chinese Medicine tongue diagnosis, computer regulation thermography, and medical microscopy (layered dried blood analysis and live blood analysis in darkfield). This Workshop includes Part 1 of a four-part survey of Biological Dentistry. Case presentations will clarify applications of the presented techniques.

*Taraxacum Officinale [Dandelion Root] is used as a mild diuretic - useful for many types of lymphatic swelling - and as an aid to liver detoxification treatment.*

## Seminar 2

May 4-6, 2007

Marion, MA area

Presenters: Thomas Rau, MD;  
James Odell, OMD, L.Ac;  
Hennie Fitzpatrick, MD;  
Bernd Orzessek, MD;  
Frank Pleus, MD, DDS

Seminar 2 addresses a wide range of topics, including orthomolecular and Traditional Chinese Medicine perspectives on the Liver/Gallbladder correspondence system, toxicology and detoxification techniques, nutritional therapy, and heart rhythm diagnostics (heart rate variability analysis and biofeedback). Also featured: an introduction to Swiss-German pharmaceutical companies and their biological remedies, notably fungal and bacterial remedies from Sanum-Kehlbeck, spagoric remedies from Pekana, complex homeopathic remedies from HEEL BHI, and plant tincture by CERES. This seminar reinforces Biological Medicine's emphasis on Biological Dentistry, the mind/body paradigm and the psychoemotional themes of illness, providing case presentations to illustrate clinical approaches to the individual patient.

## Workshop 2

September 14-16, 2007

Whole Life Clinic,  
Santa Fe, New Mexico

Presenters: Byron Braid, MD;  
James Odell, OMD, L.Ac;  
Hennie Fitzpatrick, MD;  
Bill Wolfe, DDS

Workshop 2 integrates the structural, regulatory, energetic, and psychoemotional diagnostic skills at the heart of Biological Medicine, and explains diagnostic prioritization in relationship to causal chains. Presentations will further examine heart rate variability and live blood analysis (darkfield), and move toward the therapeutic realm with instruction on orthomolecular selection and IV protocols. This workshop's Biological Dentistry lecture (Part 2 of four) focuses on dental toxicology and toxicological testing.

*Equisetum* [Horsetail] is used to help treat rheumatism and arthritis and is known for its ability to empower mental clarity, order, arrangement and structure of thinking.

## Seminar 3

November 9-11, 2007

Marion, MA Area

Presenters: Thomas Rau, MD;  
James Odell, OMD, L.Ac;  
Hennie Fitzpatrick, MD;  
Frank Pleus, MD, DDS

This seminar introduces anthropology, anthroposophic remedies, mistletoe therapy, genomic testing, and computer regulation thermography. Presentations will also examine orthomolecular and Traditional Chinese Medicine perspectives on Heart/Small Intestine and Stomach/Spleen patterns of pathology. The gastrointestinal system, including altered bowel permeability, malabsorption, and food sensitivity, will be surveyed from a Biological Medicine perspective. This seminar includes Part 1 of a two-part survey of nutritional protocols, and correlates theory and practice through case study review.

## Workshop 3

February 8-10, 2008

Whole Life Clinic,  
Santa Fe, New Mexico

Presenters: Byron Braid, MD;  
James Odell, OMD, L.Ac;  
Hennie Fitzpatrick, MD;  
Bill Wolfe, DDS

Diagnostic and therapeutic skills receive equal treatment in Workshop 3. The diagnostic techniques of laboratory assessment, functional and toxicological testing, kinesiology, and color psychology will be examined. Therapeutic topics include colon hydrotherapy, Chinese tuina, Part 1 of a two-part lecture on neural therapy, and Part 3 of our survey of Biological Dentistry.

*Echinacea* is a general immune tonic that strengthens biological terrain, an individual's internal defense and affords protection from social and environmental conflicts and external pathogens.

## Seminar 4

May 2-4, 2008

Marion, MA Area

Presenters: Thomas Rau, MD;  
James Odell, OMD, L.Ac;  
Hennie Fitzpatrick, MD;  
Frank Pleus, MD, DDS

This final seminar concludes our survey of pathological patterns with the orthomolecular and Traditional Chinese Medicine perspectives on Kidney/Bladder and Lung/Large Intestine. Also addressed in this seminar: nosodes, apitherapy, bio-resonance therapy, chelation therapy, oxidative therapy, and hyperthermia. Immune biology, including biological remedies such as the Sanum haptens, will be explored. This seminar includes the conclusion of the two-part survey of nutritional protocols.

## Workshop 4

September 12-14, 2008

Whole Life Clinic,  
Santa Fe, New Mexico

Presenters: Byron Braid, MD;  
James Odell, OMD, L.Ac;  
Hennie Fitzpatrick, MD;  
Bill Wolfe, DDS

Workshop 4 will include final lectures on kinesiology and neural therapy, and examine the relationship between acupuncture points, neural therapy, and apitherapy (honey bee venom therapy and therapeutic products of the hive). This workshop includes part 4 of our survey of Biological Dentistry, and as always, clinical case studies illustrate the full flowering of the application of Biological Medicine.

*Chamomilla [Chamomile] is used to help treat insomnia, nervous tension and irritability and is known to promote patience, calmness and inner peace.*

## Paracelsus Biological Medicine Seminar Series

November 10 - 12, 2006 | Registration Form

name: \_\_\_\_\_ title: \_\_\_\_\_

address: \_\_\_\_\_

phone: \_\_\_\_\_ fax: \_\_\_\_\_

email: \_\_\_\_\_

Are you interested in attending the entire two-year seminar series?  yes  no  not sure

### attending:

Early Registration [by August 1, 2006] \$725.00\*

Friday, Saturday, and Sunday, Nov 10 - 12, 2006

Registration [after August 1, 2006] \$800.00\*

Friday, Saturday, and Sunday, Nov 10 - 12, 2006

Full Seminar Series Discount Registration \$5,500.00\* [discount of \$1,400]

Entire two-year series [non-refundable & non-transferable]

are you a student? [\$100.00 Discount]  yes  no

[student I.D. and copy of current class schedule required]

### payment:

Visa  MasterCard  Amex  check made out to the Marion Institute

name on card: \_\_\_\_\_

card number: \_\_\_\_\_ expiration date: \_\_\_\_\_

billing address: \_\_\_\_\_

how did you hear about the seminar?

word of mouth  PBMN event  PBMN website  flier  newspaper article

advertisement  Marion Institute website  search engine [Google, Yahoo!, etc]

other: \_\_\_\_\_

This seminar will take place at "Rachel's Lakeside" at:  
950 State Road, Dartmouth, MA 02747

Please mail your registration form to:

the Paracelsus Biological Medicine Network  
c/o Marion Institute, 3 Barnabas Road, Marion, MA 02738

or fax it to us at 508.748.1976

\*Cancellation Policy: In order to receive a full refund [minus a \$50 processing fee], cancellation must be no later than 10.10.06. All meals included.
